9.1.0 Release

Release Information

- Release Version: LiveNX v9.1.0
- Release Date - February 1st 2020
- Release Designation - ED (Early Deployment)

Build Information

TinyCore

APPLICATION VERSION	
Server Version :	9.1.0-20200130-bc98a92
Web Version :	9.1.0-20200129-5e2d033+b47
OVA Version :	1.41.0

Ubuntu

APPLICATION VERSION	
Server Version :	9.1.0-20200130-111543f
Web Version :	9.1.0-20200130-5e2d033+b56

New Features and Enhancements

Device Management

- Automatic Device Refresh
- Bulk edit SNMP credentials

Dashboard

- Status Map widget supports entity filters

Reporting

- Additional default templates added to answer common questions

Alerting Enhancements

- Added Device CPU Utilization as a hierarchical alert
- Added Device Memory Utilization as a hierarchical alert
- Added WAN Utilization alert as an alert which contributes to status
- Added configurable ServiceNow fields:
  - urgency
  - category
  - subcategory
- Changed alerting fields to always show the latest data rather than the origin
